Seongyong Ju

komiicat@gmail.com | 010-7924-4901 | Seoul, South Korea

EDUCATION

Chung-Ang University (Seoul, South Korea) Mar 2021 – Feb 2027 (Expected)
Bachelor of Industrial Security
Bachelor of Science in Mathematics (Double major)
Bachelor of Science in Cyber Security (Convergence major)

EXPERIENCE

kakaobank 2026 – Present
Intern, AI Tech & Strategy

PricewaterhouseCoopers 2026
Intern, Cyber AI Lab

RESEARCH EXPERIENCES

Seoul National University

Security Optimization Research Lab (PI: Yunheung Paek)

Research Intern, Industry-Academic Cooperation Research Dec 2025 – 2026

- Integrated Secure HW/SW Architectures for Automotive Control Units (*KATECH.*)

Individual Study Dec 2025 – Mar 2026

- Real-time GPU Sharing and Fault Isolation in Confidential Computing and TEEs

Chung-Ang University

Trustworthy AI Lab (PI: Hoki Kim, Hyunjun Kim)

Collaborative Research Sep 2025 – Sep 2026

- CyBiasBench: Benchmarking Bias in LLM Agents for Cyber-Attack Scenarios

Cyber Physical System Security Lab (PI: Jaewoo Lee)

Paper Submission Dec 2024 – Mar 2026

- Solving Non-IID problem on Federated Learning by communication round cost efficiency
- Persona Attack: Incremental Memory Injection Jailbreak Attack against Large Language Models

Conferences Sep 2024 – Nov 2025

- A GraphRAG Framework for Financial Security Regulation (*Presenter, The 2025 Fall Conference of Society for e-Business Studies*)

Industry-Academic Cooperation Research Dec 2024 – Mar 2025

- Real-Time Synchronization of Autonomous Vehicles in Cloud Computing Environments (*42dot Corp.*)

Software Registration & Copyright Sep 2025 – Nov 2025

- Autonomous Valet Parking System | *Korea Copyright Commission (Reg No. C-2025-051859)*
- Autonomous Valet Parking System | *National IT Industry Promotion Agency (NIPA) (Reg No. ASSET_0014948)*

Individual Study Sep 2025 – Nov 2025

- Distributed Unlearnable Example | *Korea Copyright Commission* (Reg No. C-2025-051859)

PUBLICATIONS

CyBiasBench: Benchmarking Bias in LLM Agents for Cyber-Attack Scenarios 2026
Taein Lim*, Seongyong Ju*, Munhyeok Kim*, Hyunjun Kim, Hoki Kim (*Equal contribution)
NeurIPS 2026 Evaluations and Datasets Track

Beyond Attack Success Rate: Temporal Logit Observability for LLM Safety Failures 2026
Junyoung Park, Sunghwan Park, Seongyong Ju, Jaewoo Lee
Preprint

Persona Attack: Incremental Memory Injection Jailbreak Attack against Large Language Models 2025
Junyoung Park, Seongyong Ju, Sunghwan Park, Jaewoo Lee
Preprint

A GraphRAG Framework for Financial Security Regulation 2025
Seongyong Ju, Junyoung Park, Byunghoon Oh, Jaewoo Lee
The 2025 Fall Conference of Society for e-Business Studies

PROJECTS

Explainable AI for Deep Paper Gestalt Mar 2025 – Jun 2025
(*Project for SAFE AI*)
- Applied CAM and SHAP to provide explainability, identifying key visual and textual factors that influence reviewers' first impressions

Industrial Control System Anomaly Detection on the HAI Dataset Sep 2024 – Dec 2024
(*Project for Artificial Intelligence and Security Technology*)
- Developed a Bidirectional LSTM Autoencoder-based time-series anomaly detection pipeline for identifying cyber attack intervals in HAI industrial control system data

Cloud-Based Secure Network Infrastructure Design Sep 2024 – Dec 2024
(*Project for Operation & Application of Security System*)
- Deployed and configured security solutions, including VPN for encrypted remote access and WAF to mitigate web-based threats

HONORS & Patents

2026 ASCII-THON University Hackathon, Security Solution Track Jan 2026
Excellence Award | *Ajou University*
- Developed an integrated data rights service for digitally excluded groups, streamlining consent analysis and rights enforcement to prevent targeted digital crimes

2025 Data Safety Zone Competition Sep 2025 – Nov 2025
Excellence Award (Shinhan Card CEO Prize) | *Korea Data Agency*
- Recognized for a study on "Scenario-based Fallback Strategies for Level 4 Autonomous Driving" using highway traffic accident data (using MATLAB/Simulink)

2024 Patent Contest for Secure Data Utilization Sep 2024 – Dec 2024
Grand Prize (1st Place) | *2024 CAU Digital-Trust Research Center*
- Designed a framework for AI reliability and safety by integrating privacy-preserving processes into data collection, model development, and deployment stages

EXTERNAL ACTIVITIES

H-Mobility Class, Autonomous Driving Technology Apr 2026 – Present
Hyundai Motor Group

- Completed a comprehensive 6-month specialized course on the technical architecture and core components of autonomous vehicles

Match-Up Autonomous Driving Technology Sep 2024 – Dec 2024
Hyundai NGV

- Completed a comprehensive 6-month specialized course on the technical architecture and core components of autonomous vehicles

24th University Student Talent Voluntary Service Camp Dec 2021 – Feb 2022
Korea Student Aid Foundation (KOSAF)

- Facilitated hands-on coding sessions and managed program logistics and budgeting as a team mentor
